Missouri Right to Life Federal Political Action Committee Releases 2020 Presidential and Congressional Election Endorsements

The following statement is from Dave Plemmons, Chairman of the Federal Political Action Committee:

Today, the Missouri Right to Life Federal Political Action Committee released its endorsements in the 2020 Presidential and Congressional elections.

The Missouri Right to Life Federal Political Action Committee determines the pro-life positions of candidates running for office and endorses and supports those endorsed candidates in their election efforts. The list below, with the exception of the first Congressional District, includes incumbent Congressmen and Congresswomen. These individuals have proven over their many years in public office that they will stand firm for the protection of innocent human life.

It is very important that the pro-life citizens of Missouri vote for these MRL PAC endorsed candidates.

President:

Donald J. Trump (R)
